		DCN No: E010140-00-D
	CALIFORNIA INSTITUTE OF TECHNOLOGY MASSACHUSETTS INSTITUTE OF TECHNOLOGY	SHEET 1 OF 2
DOCU	MENT CHANGE NOTICE (DCN)	
DOCUMENT No. (DOC-REV-GP. ID)	TITLE	NE RE
E960100-B-D	Substrate, Beam Splitter	C
CHANGE DESCRIPTION (F	DOM/TO).	
CHARGE DESCRIPTION (F	KUM/TU):	
		eation on to the barrel of the substrate
Remove the requirement This is done since we	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove	revision letters in the event of revision
Remove the requirement This is done since we changes. Existing hard	ent to etch the current revision letter of the specific	revision letters in the event of revision
Remove the requirement This is done since we changes. Existing hard	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove	revision letters in the event of revision
Remove the requirements is done since we changes. Existing hard onto the barrel	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove adware with rev. letters will not be modified, BS06 v	revision letters in the event of revision
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, means	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 of the specification section: sured over the central 200 mm diameter	revision letters in the event of revision will be built with no rev. letter etched
Remove the requirement of this is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, means to reflect language age.	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 of the specification section: sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the	revision letters in the event of revision will be built with no rev. letter etched
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, means	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 of the specification section: sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the	revision letters in the event of revision will be built with no rev. letter etched
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, means	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 of the specification section: sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the	revision letters in the event of revision will be built with no rev. letter etched
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, measure than the change only and does	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 of the specification section: sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the not effect hardware.	revision letters in the event of revision will be built with no rev. letter etched to be built w
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, measure than the change only and does	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 of the specification section: sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the	revision letters in the event of revision will be built with no rev. letter etched to be built w
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, measure than the change only and does	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 of the specification section: sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the not effect hardware.	revision letters in the event of revision will be built with no rev. letter etched to be built with no rev. letters are conditions of rev letters
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, measurement to reflect language against the change only and does REASON FOR CHANGE:	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 version of the specification section: Sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the not effect hardware. Specific agreed language and practical ham change Attach DCN to drawing(s) Other action (specific do not effect)	revision letters in the event of revision will be built with no rev. letter etched to LIGO Beamsplitters. This is a recondition of rev letters
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, measurement To reflect language against the change only and does REASON FOR CHANGE: ACTION: Incorporate	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 version of the specification section: Sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the not effect hardware. Update to reflect agreed language and practical handchange Attach DCN to drawing(s) Other action (section of the not of the not of the not of the not effect hardware.	revision letters in the event of revision will be built with no rev. letter etched to be built w
Remove the requirement This is done since we changes. Existing hard onto the barrel Update the language of Surface Figure, measurement To reflect language again change only and does REASON FOR CHANGE: ACTION: Incorporate	ent to etch the current revision letter of the specific do not want to have to repolish the OD to remove a dware with rev. letters will not be modified, BS06 version of the specification section: Sured over the central 200 mm diameter greed to with CSIRO during the manufacture of the not effect hardware. Update to reflect agreed language and practical handchange Attach DCN to drawing(s) Other action (section of the direct change only)	revision letters in the event of revision will be built with no rev. letter etched to LIGO Beamsplitters. This is a recondition of rev letters
