Wire clamp pass-through slots widened as follows:

From: ZN D9, "2X .400 WIDE SLOT THRU"  
To: ZN D9, "2X .550 WIDE SLOT THRU"

Three center holes changed from thru holes to blind holes. The blind holes allow the bolts inserted into these holes to be torqued appropriately. This was accomplished on the LLO OMC by using vented setscrews to create a false bottom.
