

# LIGO Science Symposium PRESENTATIONS

Thursday, November 11, 1999

|  |   |
|--|---|
| Cliff Will<br><i>George Washington<br/>University, St. Louis</i> | <a href="#"><u>General Relativity and Gravitational Waves</u></a>           |
| Mike Turner<br><i>University of Chicago</i>                      | <a href="#"><u>Cosmology and Gravitational Waves</u></a>                    |
| John Bahcall<br><i>Institute for Advanced Study</i>              | <a href="#"><u>Solar Neutrinos and LIGO: Any parallels?</u></a>             |
| Kip Thorne<br><i>California Institute of Technology</i>          | <a href="#"><u>Gravitational Waves: Sources and Signals</u></a>             |
| Peter Saulson<br><i>Syracuse University</i>                      | <a href="#"><u>Suspended Mass Interferometry</u></a>                        |
| Stan Whitcomb<br><i>California Institute of Technology</i>       | <a href="#"><u>LIGO</u></a>   |
| Adalberto Giazotto<br><i>VIRGO/INFN-Pisa</i>                     | <hr/>   |
| Albert Lazzarini<br><i>California Institute of Technology</i>    | <a href="#"><u>Detection of Gravitational Waves with<br/>LIGO/VIRGO</u></a> |
| David Blair<br><i>University of Western Australia</i>            | <a href="#"><u>Resonant Bars</u></a>  |
| Karsten Danzmann<br><i>University of Hannover</i>                | <a href="#"><u>Gravitational Waves in Space</u></a>                         |
