

Possibilities and plans in Asia

K.Somiya and H.Shinkai

Enquiry to 5 Asian countries

- China
Answered by Zhu, Yeh, and Ni
- India
Information from Raja via David
- Japan
Answered by Nakamura
- Korea
No answer to the enquiry
- Taiwan
Answered by Haino, no concrete plans

Information from

- Z.Zhu, BNU
- H.Yeh, NSYSU
- S.Raja via David
- T.Nakamura, Kyoto
- W.Ni, NTU
- S.Haino, ASIAA

China

- TianQin (space project)
 - planned to launch in 2035
 - international project
- TAIJI (space project)
- ZAIGA (atom interferometer)
 - 3km tunnel
 - planned in Erzhou
- AAGO (Australia-China project)

India

- Intense activity to realize the LIGO India
- 3G plans are purely on R&D for laser and optics with no concrete roadmap

Japan

- It has been commonly recognized in JGWG that the main subject after KAGRA (and +) in Japan will be DECIGO
- It shall be noted that the ET-KAGRA (ELITES) collaboration has made a big contribution in the construction of KAGRA and we will keep it toward the construction of ET
(A number of people from Japan have signed in to the ET collaboration)
